

Description

The FORTA[®] Rover volumetric fiber dispenser is a variable speed, chop-on-demand dispenser of MOBILE-MESH™ fiber roving for addition into a volumetric concrete truck. Standard cut length of the roving is approximately 3/4 in. The Rover is very efficient and easy to operate.

The Rover is installed on the rear of the volumetric truck. It uses the truck's existing air supply and is easily connected to the truck's controls for convenient operation. The Rover chops the MOBILE-MESH™ roving at the desired feed rate and dispenses it directly onto the belt or into the mixing chamber of the truck.

Advantages

- Exceptional accuracy
 - Better quality control
 - Low maintenance*
 - Easy to use
 - Easy to install
 - High capacity
 - Easy to load and use
- * To maintain accuracy, some maintenance is necessary.

Specifications

Dimensions (H x W x D)	19 x 12 x 12 in (485 x 305 x 305 mm)
Weight	32 lb (14.5 kg)
Discharge Tube Diameter¹	3 in (76.2 mm)
Feed Rate (max)	Approximately 2 lb/min (0.91 kg/min) ²
Weight of Bobbin	42 lb (19 kg)
Utilities Required for Operation	
Electrical	12 or 24 VDC fused power source
Air	90 psi

1. Static-resistant tubing, length as needed to go between discharge on bottom of Rover and point-of-use on truck.
2. Feed rate of single bobbin unit. A two bobbin unit is available for increased yield.

Applications

Used on volumetric concrete trucks for adding MOBILE-MESH™ alkali resistant glass fiber to concrete applications. Visit our YouTube channel to see our dispensers in action!
